

Arizona's Sun Corridor

Open for Business

Industry Strengths in the Corridor

Information Technology

- A reliable supply of power and water resources, combined with an affordable business environment, make the Sun Corridor a preferred location for information technology companies.
- The region offers California high-tech firms an opportunity for productivity, cost savings and profitability.
- Arizona ranks 4th nationwide for semiconductor employment with nearly 24,000 workers in computer chip manufacturing. (Bureau of Labor Statistics)
- Arizona's rural communities are ideal settings for data center placement.
